PROFESSIONAL SUMMARY

I am a passionate Computer Science student currently pursuing my B.Tech at Lovely Professional University. I have hands-on experience with cloud computing, automation, and backend development, having completed a certified internship focused on real-world cloud-based technologies. With strong skills in Java, C++, Shell scripting, and a keen understanding of AWS and DevOps practices, I am eager to apply my technical knowledge and problem-solving abilities to contribute to innovative projects. I am enthusiastic about learning, growing, and bringing value to a dynamic team.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) <i>Lovely Professional University, Phagwara, Punjab</i>	August 2022 – Present
Intermediate Education (MPC) <i>Sri Chaitanya Junior College, Vijayawada, Andhra Pradesh</i>	April 2020 – March 2022

INTERNSHIPS / WORK EXPERIENCE

Cloud Computing Intern <i>Mind Spare, Hyderabad</i>	May 2024 – August 2024
- Completed a certified internship in Cloud Computing, demonstrating strong dedication, determination, and hard work. - Gained hands-on experience in cloud-based technologies and practices, working closely with industry experts. - Developed a practical understanding of cloud deployment, management, and optimization in a professional environment.	

PROJECTS

Automated Apache Cloud Stack Setup on Ubuntu
- Scalable 3-tier web application was successfully deployed on AWS EC2, featuring an Application Server, a Node.js Backend, and a Database Server. - This deployment utilized AWS services to ensure high availability, including Elastic Load Balancing to distribute traffic across multiple EC2 instances and Auto Scaling to dynamically adjust instance numbers based on demand. Key achievements included automating the provisioning and scaling of cloud resources, which reduced manual interventions by 50% and significantly improved deployment speed. - Additionally, DevOps best practices were implemented to enhance cloud operations, infrastructure automation, and system reliability. The architecture was designed for scalability and efficiency, leveraging AWS capabilities to minimize downtime and maximize performance. Tech: Ubuntu, Shell Scripting
Scalable 3-Tier Web Application Deployment
- A scalable 3-tier web application was successfully deployed on AWS EC2, featuring an Application Server, a Node.js Backend, and a Database Server. This deployment utilized AWS services to ensure high availability, including Elastic Load Balancing to distribute traffic across multiple EC2 instances and Auto Scaling to dynamically adjust instance numbers based on demand. - Key achievements included automating the provisioning and scaling of cloud resources, which reduced manual interventions by 50% and significantly improved deployment speed. Additionally, DevOps best practices were implemented to enhance cloud operations, infrastructure automation, and system reliability. The architecture was designed for scalability and efficiency, leveraging AWS capabilities to minimize downtime and maximize performance. Tech: AWS, Wire shark

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate <i>Microsoft</i>	April 2025
- Demonstrated expertise in implementing, managing, and monitoring Microsoft Azure environments, including virtual networks, storage, and compute resources. - Acquired strong skills in Azure identity management, governance, and security to support enterprise cloud solutions.	

KEY SKILLS

Programming Languages	: Java, C++, Python, Shell Script.
Cloud & DevOps	: AWS, CI/CD (Continuous Integration & Continuous Deployment), Automation.
Tools & Technologies	: Ubuntu, Git, GitHub, VS Code, Figma, MySQL Workbench.
